Learn all about the numbers 1 to 10 with Sylvan's proven techniques for success! Learning the basics about numbers is a crucial part of the preparation for kindergarten and an important step on the way to math success. The activities in this workbook are designed to help your child get ahead and develop a love of learning—and best of all, to have lots of fun doing it! Here are some of the great features you'll find inside: **See, Show, and Tell** Children become comfortable with the numbers 1 through 10 by speaking the number aloud, showing it on their hands, and drawing and coloring fun pictures related to each number. **Terrific Tracing** Ample tracing opportunities give children the chance to recognize figures and practice writing each digit. **Hide and Seek** Seeking out and circling numbers that are "hiding" in colorful pictures helps students gain confidence in their number recognition skills. **Color by Number** Follow directions to color each numbered section of a picture to reveal a hidden image as a surprise. Give your child's confidence a boost with *Pre-K Beginning Numbers*!
